Getting "Geared Up!"

SCC continues to gear up for the implementation of the new Student Information System (SIS).

October 9, 2007...we are **55 days** from implementing SIS.

The next couple of weeks, the system will also be engaged in load testing. During load testing the system will face a variety of simulated loads to ensure timely responsiveness and adequate infrastructure capacity. Testing scripts are being developed that will allow testing using 300 users with an eventual scale-up to literally "thousands" of users.

Integration Testing

The project has entered one of the most exciting and important stages of the implementation process—integration testing.

Integration testing is "...a testing process where a variety of real life functional scenarios are used to determine the system's "readiness" for production." Integration testing has allowed additional SCC staff members to participate in this project.

New Process—Grade Rosters

October 9th, 2007 the Maricopa Colleges will go live with our new student information system (SIS). From that point on we will no longer be printing final grade rosters for your grading process; you will post grades on-line. Training for the new SIS will take place on September 14th and 21st and will be offered multiple times each day. Watch your email for more information to follow.

Faculty Facts

SIS Faculty Training:

We have scheduled the following one hour training sessions for faculty in BU141N:

Friday, September 14th
12:30 - 1:30pm
2:00 - 3:00pm
3:30 - 4:30pm

Friday, September 21st
12:30 - 1:30pm
2:00 - 3:00pm
3:30 - 4:30pm

You will learn how to print rosters; input grades, and access class enrollment. To sign-up for a training session email bj.bentz@sccmail.maricopa.edu with date and time.

“Ask Artie...”

What is the Student Information System (SIS)?

The Student Information System (SIS) is a software application that was purchased by the Maricopa Community Colleges to replace the current SIS or “Legacy” system. The Student Information System is an Oracle product. For more information, visit the [Oracle website](#).

Will students be able to register for all classes on-line?

Generally, students that have met all pre-requisites and/or co-requisites for courses will be able to enroll using self-service. If they have not met these requirements, they will be directed to see an advisor.

Will Faculty be able to enter and edit grades on-line?

Yes. After go-live, faculty members will be entering and editing grades on-line through the SIS self-service functionality.

Will faculty be able to print class rosters?

Yes. Faculty members will have access to view and print class rosters through faculty self-service.

Will the legacy data, such as course information and student enrollment, be available in the new SIS system?

Yes, historical data will be converted from the legacy system to new SIS.

Can I enter grades remotely?

Yes. Grade may be entered from any internet-linked computer with an up-to-date browser using your login and password.

Will I use as my MEID to access the application?

Yes. The Maricopa Enterprise ID will be used to access SIS.
